

About SSC

We help Earth benefit from space

SSC is a global provider of advanced space services. We develop experiment payloads and provide rocket and balloon launch services at our unique facility Esrange Space Center.

We also provide reliable access to satellites through our SSC ground network, one of the largest ground station networks in the world. Furthermore, we provide engineering expertise to all phases of our customers' space programs.

With extensive experience and a solid understanding of the rapidly changing space market, we tailor innovative and sustainable solutions to institutional and commercial customers worldwide.

SSC covers the global market through its offices in Sweden, Germany, the Netherlands, USA, Chile, Australia, China and Thailand, along with the global network of ground stations.

SSC was founded in 1972 and has 500 employees.
